

Course: CS445

Author: dyoung9@hawk.iit.edu

Assignment: HW-1

Date: 9/12/2017

Summary

The status of the assignment is partial completion. The parts that are missing include missing implementation for the eat() method, and missing code coverage report. I am struggling with getting the code coverage tools to work due to various compatibility issues. This has been the most difficult part of the assignment since the documentation is somewhat scarce.

Statistics

Lines of code: 217

Unit test lines of code: n/a
